Deadline: 29:59, 14 Jun 2026 (5:59 AM, 15 Jun 2026)

Name(s): _____ School: _____

You should submit a repo having the answer of the following questions. All answers should be in the form of code, and you can use comments to explain your code. You can also write a small report to explain your code if you want.

```
/// ===== Question X START =====  
(Codes / Answers)  
/// ===== Question X END =====
```

1. For letting the LCD display something, we require data flow _____(in/out) from the broker.
2. Implement the endpoint/outpoint for reading the temperature data from the sensor (simulator).
3. Write a dashboard to display the temperature data.
